

ENVIRONMENT POLICY

Auspower Connect protects the condition and security of the environment and is committed to maintaining safe work and safety in design for the environment and wider community. As such, and given the enduring nature of Auspower Connect operations, our company has substantial control and influence over environmental aspects both presently and into the future. In order to achieve our environmental aims, we have established an integrated management system, which incorporates the requirements of ISO 14001:2015 standard for Environmental Management Systems.

We recognise the importance of minimising impact upon the environment and strive for environmental excellence in all our activities, striving to achieve environmental excellence in prevention of pollution, which we commit to.

Our Philosophy

- Prevention is the key to maximizing protection
- Focus on leadership and recognition of potential impacts
- Identify and implement responsible and sustainable practices

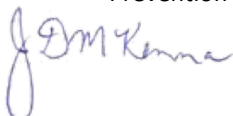

Our Objective

- No damage, No harm
- Comply with relevant legislation and procedures
- Identify and implement sustainable practices
- Respond responsibly to improve project outcomes

Our Method

Auspower Connect strives to meet these objectives by:

- Maintaining and promoting positive communication and consultation with personnel and stakeholders.
- Recognizing and respecting ecological sustainability.
- Implementing policy through training, supervision and auditing.
- Clarify risk management principles to control and identify hazards, behaviours, accidents, pollution or environmental damage.
- Monitoring, measuring and improving the effectiveness of Environmental Management system.
- Maintaining accountabilities and responsibilities of all personnel to implement the Environmental Management system and safety in design.
- Complying with all legal and regulatory requirements.
- Integrating Environmental Management strategies throughout the business.
- Annual reporting on Environmental performance, measured against business objectives.
- Prevention of pollution in relation to air, water, land, biodiversity, and cultural heritage
