

QUALITY POLICY

Auspower Connect strives to provide high quality services for the benefit of our clients. This is ensured through the implementation of quality assurance procedures for all projects undertaken by the company and is committed to working within the framework of ISO 9001:2015 Quality Management System (incorporating Amendment 1:2024 – Climate action changes).

Our Objective

To build successful and positive relationships by ensuring we understand and contribute to our client's requirements and conform to these requirements at all times.

Our Method

Auspower Connect strives to meet these objectives by:

- Providing sufficient resources to establish, implement and continually improve the Quality of our product.
- Communicating this policy to personnel through inductions, training, and examples in the work place.
- Promoting a standard of No Defects. Monitor the effectiveness of the quality management system through a program of audits to monitor performance and identify improvement opportunities.
- Sustaining a culture of routinely doing things right, while building solid relationships.
- Compliance with all relevant legislative and regulatory requirements.
- Undertaking continuous reviews of our performance and assess feedback from clients, with a view to continual improvement.
- Monitoring the progress of the ISO 9001 revision program and transitioning our Quality Management System to the next edition of ISO 9001 within the certification body's required timeframe once it is published.

Our company's quality assurance system is fully implemented throughout our operations and high levels of support are required from all employees, subcontractors, and suppliers.
